July 9, 2008

To Whom It May Concern:

I am writing to you regarding the European Union's RoHS regulation. This regulation is found in Directive 2002/95/EC. It relates to "the restriction of the use of certain hazardous substances in electrical and electronic equipment".

The hazardous substances listed in this directive, lead, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE) are not used in Calumet Penreco's USP / NF grade mineral oils, nor in our USP grade petrolatums. We do not test for these chemicals, but are confident that based on our knowledge of raw materials and processing that they would not be detected by normal analytical procedures.

Therefore the USP / NF grade white oils and USP grade petrolatums are in full compliance and are certified to **not** contain either PBB's or PBDE's.

Please let us know if we can help with anything else.

Sincerely,

A handwritten signature in black ink that reads "Erik M. Lorence".

Erik Lorence
