Dear Calumet Customer,

OSHA's revision to the Hazard Communication Standard (HCS or "HAZCOM"), published in the Code of Federal Regulations at 29 CFR 1910.1200 became effective on May 25, 2012, with some delayed compliance dates, as published on March 26, 2012. See link below.

http://www.osha.gov/pls/oshaweb/owadisp.show_document?p_table=FEDERAL_REGISTER&p_id=22607

Calumet Specialty Products Partners, L.P. will be updating all of our safety data sheets and labels to comply with OSHA's new Hazard Communication Standard, on or before the regulatory deadlines.

The revised regulation uses principles from the Globally Harmonized System (GHS) Purple Book for classification regarding physical, health and environmental hazards. Most of the information on our current SDSs will remain the same. However, the SDSs will be updated with new pictograms and specific phrases. The updated classifications will be based on new, current or tested data for our products.

The revised Hazard Communication Standard required that employees be trained on the new regulation by December 1, 2013 for all chemical manufacturers, importers, or distributors within the United States. All SDS and label generation must be updated by June 1, 2015, noting a 6-month grace period that will exist for all materials already in commerce on that date.

We are dedicated to providing our customers with the correct hazard classifications and information on proper handling and safe use of our products through our SDSs and labels.

Any questions regarding this updated information for our products can be directed to our Regulatory and Technical Department at: 800-437-3188 or 317-328-5660 or you may email your request to us at: msds@calumetspecialty.com.

Please feel free to contact me if you have any additional questions or concerns.

Sincerely,

Christopher L. Miano, MS
