Dear Calumet Specialty and Calumet Penreco Customers,

As you are aware, the European Union published the REACH (**R**egistration, **E**valuation and **A**uthorization of **C**hemicals) legislation on December 30, 2006 and it entered into force in all countries of the EU as of June 1, 2007. In order to comply with all the new requirements and deadlines, information flow, up and down the supply chain, is vital.

As a US manufacturing company, this letter is to confirm that Calumet/Penreco has pre-registered, or fully registered all of our substances directly exported to the EU by Calumet. We will be converting all pre-registrations to full registration prior to the 1 June 2018 deadline for all substances exported above the 1 MT/Year tonnage limit.

We have historically advised our non-EU customers to engage their own registrations for substances for exported into the EU. We continue to work with our customers who plan on exporting to the EU and provide data for their REACH registration efforts. Our Only Representative Firm is H2 Compliance in Dublin, Ireland.

Calumet/Penreco, in cooperation with other SEIF members, will work to coordinate data gathering, testing and ultimately registration of our direct exports based on the appropriate volumes and compliance timeline. We will continue to provide data support for our customers who export to the EU.

Calumet has also established alternatives for provision of its EU-REACH (pre)registrations for the CAS numbers that we maintain. Please ask your sales representative for assistance for these alternatives.

Calumet/Penreco has a REACH Implementation Team to address these important issues. If you have any questions, please do not hesitate to contact us.

Sincerely,
