

LUBRICATING GREASES

Lubricating greases are widely used in the automotive and industrial markets. They are semi-solid substances applied to mechanisms to minimize leaks and outside contamination, prevent corrosion, and lubricate components. Calumet manufactures and markets paraffinic, naphthenic and white mineral oils that meet the specific requirements for the grease market.

APPLICATIONS

- Construction Equipment
- Food Processing Equipment
- Mining Equipment
- Agricultural Equipment
- Railroad Rail
- High-Speed Bearings
- Low-Speed Bearings
- High-Temp Bearing
- Low-Temp Bearing
- Automotive Wheel Bearings
- High-Speed Flex Couplings
- High-Temp Roller Element Bearing
- Open & Enclosed Gear
- Cable/Wire Rope

BASE OILS

We offer an extensive product line of naphthenic and paraffinic base oils that cover a wide range of viscosity and solvency characteristics that can be used in the greases market. Base oils are the foundation of lubricating greases, and the majority of greases utilize them as the fluid component for industrial applications.

HYDROCAL™ NAPHTHENIC BASE OILS

WHITE OILS

White oils like DRAKEOL® and PAROL® can be used in the greases market for NSF H1 (incidental food contact) applications. They can also be used for complex soap and non-soap thickeners in rolling and bearing applications.

MINERAL OIL USP

PROPERTIES	METHOD	DRAKEOL 35	DRAKEOL 500

TECHNICAL ASSISTANCE

For product or technical questions, contact your Sales Representative or Calumet Product Support at (800) 437-3188 or email technical@clmt.com.

Calumet's sampling and testing procedures in effect at the time of production will be used for certification testing. Results may be based on tank certification, manufacturing data, periodic testing and/or most recent product restock. Typical values only represent the values one would expect if the property were tested in our laboratories with our test methods on the specified date. Some product properties are not frequently measured, and accordingly typical values are not based on a statistically relevant number of tests. The information in this document relates only to the named product. The user is solely responsible for all determination regarding any use and any process.
